ABOUT REECO

30 YEARS OF EXPERIENCE

Over the years our employees have turned into the top class professionals. Numerous training courses allowed us to implement the most modern solutions, patterns and designs of our products. We were also able to achieve it because of our efficiency and staff engagement.

5 BRANCHES IN EUROPE

We provide innovative customer relationship management solutions. All of our branches across Europe are equipped with DEMO ROOM, where we can prove the effectiveness of our products.

1600 m² WAREHOUSE AREA

Our logistic and warehouse personnel is always equipped with sufficient knowledge about the status and realization stage of each order. Our warehouse staff enables us to deliver orders promptly and directly to you.

PRIZES AND AWARDS

Since the very beginning we make tremendous effort to make sure, that our customers and REECO users are able to make use of our products for extensive period of time.

Our brand's quality got proven by numerous awards.

For example the **MAIN PRIZE** in 2015 DOBRY WZÓR (GREAT DESIGN) contest organized by Institute of Industrial Design. Moreover, we were given a credit of satisfaction from our customers - such appreciation is the best award.

FAIRS AND CONFERENCES

We are advertising and promoting our products during various domestic and foreign conferences and fairs. You can meet us at Automaticon, Productronica, Motek and TIB.

Wherever we meet, our employees will be happy to support you including presentation and detailed discussion.

5 YEAR WARRANTY

ALL PRODUCTS INCLUDED IN THIS CATALOGUE
ARE COVERED BY 5 YEAR WARRANTY PERIOD

ESD PROTECTION

ESD protection is crucial for electronics industry. We have extensive experience in developing, manufacturing and supplying ESD furniture.

ESD Stands for Electrostatic Discharge. Static electricity is an imbalance of electric charges within or on the surface of a material.

The charge remains until it is able to move away by means of an electric current or electrical discharge.

Normally, electric charges are discharged slowly from surface of objects. However, if the difference in electric potential becomes too great the electrical current accelerates resulting in a sudden current surge.

An ESD protected area is called EPA. In an EPA area ESD protection must be observed in all materials, employees' clothing and air humidity.

Workstations and employees in an EPA area must also be grounded with protective resistance (1 Mohm) to an ESD ground. ESD protection ensures safe working environment. In electronics industry, work is often carried out in an EPA area, that is protected from static discharge.

Protection in this case means effective grounding, which involves both grounding equipment and painting the frame of the ESD workstation with semi-conductive paint.

We have extensive experience in developing, manufacturing and supplying ESD furnishings. All our workstations and related products are supplied with an electrically semi-conducting coat of paint and we supply furnishings, seats and grounding components for ESD-protected workstations.

Our products meet the requirements specified in the PN- EN-61340-5-1:2009 standard.

ERGONOMICS

Human being is the most important element of every working environment. An employee cannot successfully perform his duties, unless the work surroundings are adjusted to specific psychophysical characteristics.

Therefore, the issue of ergonomics needs to be considered a priority and incorporate a whole range of human psychophysical activities.

ERGONOMICS = EFFICIENT AND SAFE WORK

Main ideas of ergonomics refer to employee's health (the elimination of occupational diseases), job satisfaction development and a maximal increase in productivity.

Modularity of Reeco furniture, a wide range of components and a variety of accessories enable an easy implementation of ergonomics in the workplace.

EVERYTHING IS AT YOUR FINGERTIPS

Our work stations are designed in such a way as to provide an optimal height of table tops and shelves, which are equipped with a set of essential accessories. A well thought-out design imposes a correct adjustment and positioning of tools and equipment.

A workplace station, where all tools are within the user's immediate reach, is a great benefit for the company, which saves valuable time and ensures safety and order.

MODULARITY

One of the most important advantages of REECO furniture is its modularity. Modular construction of REECO furniture divides the whole system into interchangeable units (modules), which are produced and sold independently.

These individual elements can also be used in other modular systems of industrial furniture.

With the possibility of a flexible development, REECO furniture can be used in many branches of industry, and in places like storehouses, production lines, workshops, tool shops, laboratories and lecture rooms.

Moreover, there is an option of exclusive designs for individual companies and of their subsequent extensions, which arise with the customer's expanding needs.

We have also prepared ready-made workstations, whose configurations provide for typical customer's needs (pages 58-61).

**ERGONOMICS AND MODULARITY
FOR BETTER FUNCTIONALITY**

PREMIUM TABLE FRAME

PREMIUM TABLE FRAME was designed for industries where ergonomics and comfort play special role and are crucial for workers performance.

This construction can be easily adapted to operator's needs according to performed activity (sitting or standing type of work).

- Max load capacity: 600 kg
- Height adjustment: 670 -1120 mm
- Type of height adjustment: stepless (internal rail)
- Type of height adjustment lock: 4 screws per leg
- Leveling feet
- Applicable table top: rectangular, ergonomic
- Metal cast foot for increased stability

Reeco

PREMIUM ELECTRICALLY ADJUSTABLE TABLE FRAME

PREMIUM ELECTRICALLY ADJUSTABLE TABLE FRAME has been equipped with electric actuators for adjusting the height of the table top. Modern top lifting columns have a high load capacity and very low power consumption, at 0.1W, in standby mode.

- Compliant with EN 60335-1 standard
- Smooth starting and stopping provided by the control box
- Low noise level
- Maximum power: 1600 N (per leg)
- Maximum speed: 43 mm/s (at no load)
- Power supply: 24 V (AC adapter included)
- Smartphone application for height adjustment via Bluetooth

CLASSIC TABLE FRAME

CLASSIC TABLE FRAME is cost-efficient solution designed for wide range of tasks.

- Max load capacity: 300 kg
- Height adjustment: 670 - 1120 mm
- Type of height adjustment: stepless (internal rail)
- Type of height locking: 2 screws per leg
- Leveling feet
- Applicable table top: rectangular, ergonomic

PREMIUM CORNER MODULE

Corner module provides the ability to connect two Premium tables. As a result users obtain one integrated workstation contributing to improvement of space management.

Corner modul available in one size.

PREMIUM CORNER MODULE - DIMENSIONS (MM)

- Comes together with ESD table top
- Max load capacity: 100 kg
- Stepless height adjustment: 670 - 1120 mm
- Additional supporting leg provided as an option for higher load capacity

Catalogue number

TABLE TOP FOR CLASSIC CORNER FRAME - DIMENSIONS (MM)

ANTI-VIBRATION TABLE

Anti-vibration table is an essential element of every laboratory. In order to ensure consistent and proper operation of scales, microscopes and measuring devices they are placed on a specially designed granite plate.

All types of vibration that may affect the operation of the devices (generated by other devices in a laboratory or transmitted through the floor) is eliminated thanks to vibroisolators on which the plate is mounted.

- Height adjustment range: 670 - 1120 mm
- Max load capacity of granite plate: 40 - 100 kg
- Antistatic design table - CLASSIC version (page 13)
- 4 robust vibroisolators
- Two-layer board made of polished granite
- Standard sizes of granite board: 500 x 500 mm
- Different sizes of granite board applicable

MOVABLE ESD UPRIGHT FRAME

Movable ESD upright frame is ideal for manufacturing facilities, workshops, laboratories, and all these places where mobility is required for fast moving of parts and tools. Thanks to modular design all 900 mm accessories are applicable.

MOVABLE FRAME

- 4 x 75 mm swivel castors - 2 with braking systems
- 2 horizontal bars for better stability
- CPU holder
- External dimensions (w/o wheels): 900 x 1860 mm

TABLE TOP FOR MOVABLE FRAME

- Colour: RAL 7036
- Outer layer: scratch and moist resistant ESD laminate
- Core: conductive, moist resistant

ERGONOMIC TABLE TOP

Table top is an essential element for the whole structure of the table. The distinguishing feature of REECO furniture is the ergonomic table top-unique solution to increase ergonomics of workstation.

Table top is covered with a conductive laminate on both sides (top and bottom layer). The edges are finished with scratch-and impact-resistant ABS material.

Thanks to threaded bushings on bottom side of the table top, installation to Premium or Classic frame is quick and easy.

Core of the table top is composed of resin and chipboard for robustness even under heavy loads.

As a result of using the conductive core, table top provides protection against ESD throughout its structure.

- Colour: RAL 7036
- Outer surface: conductive laminate, moisture and scratch resistant
- Core: conductive, moisture resistant
- Fixing to frame: threaded bushings

RECTANGULAR TABLE TOP

Table top is covered with a conductive laminate.
Edges are finished with scratch resistant and impact resistant ABS plastic. Easy fixing to the frame using threaded bushings.

Structure of the table top, which is composed of resin and chipboard guarantees strength even at high loads.

As a result of using a conductive core, table top over its entire surface provides protection against ESD.

- Colour: RAL 7036
- Top layer: conductive laminate, increased resistance to moisture and scratches (only table top with conductive laminate)
- Core: conductive, resistant to moisture
- Fixing to frame: threaded bushings

PERFORATED UPRIGHT FRAME

Perforated vertical frame is one of the basic elements.

Accessories such as shelves, suspension rails with plastic containers, perforated panels are mounted on the frame.

Perforation allows the placement of accessories at any height. The frame is available in three standard widths.

LIGHT AND BALANCER RAIL

Another useful accessory is lamp and balancer rail. Lamp and balancer rail is mounted on upright frame.

Thanks to perforation of upright frame it can be installed at virtually any height above table top.

LAMP BRACKET

Lighting and balancer rail is dedicated to LED lamp installation. Thanks to its design it provides easy vertical adjustment of the light beam.

LIGHT AND BALANCER RAIL

Lamp and balancer rail is mounted on upright frame. Thanks to perforation of upright frame it can be installed at virtually any height above table top.

MODULAR STORAGE SYSTEMS

Reeco offers modular storage systems. Modularity means that the entire storage system can be easily expanded or modified by adding or exchanging several basic components.

The construction of cabinets and shelves is based on the perforated frames allowing for quick and easy upgrades. Inside there are supports ensuring high stability even at high loads.

You can easily create versatile storage solution by customizing it to suit your needs. Simply choose appropriate accessories and position them at desired height.

ACCESSORIES COMPATIBLE WITH RACKS AND CABINETS:

- 1000 x 400 mm shelves
- Perforated panels
- Drawers (Optional)

PLEASE CONTACT OUR SALES REPRESENTATIVE IN ORDER TO RECEIVE
QUOTATION OF SOLUTION CUSTOMIZED TO YOUR NEEDS

ROLLER ESD TRANSPORT SYSTEMS

Thanks to the modularity of REECO ROLLER TRANSPORT SYSTEMS it is possible to adopt the system to many production process taking into account subsequent production phases.

ADVANTAGES

- Stable and rigid construction
- Possibility of connecting with other transport systems
- Height and angle adjustment of upper and lower transport pallets
- Possibility of integration with workplaces

INDIVIDUAL SOLUTIONS

To ensure work ergonomics, it is necessary to design hall project with planned transportation system.

Considering such necessity, at design stage, we offer tailor the system to application, weight and dimensions of goods and characteristics of environment.

WE SPECIALIZE IN CREATING AND IMPLEMENTING SOLUTIONS FOR ELECTRONICS INDUSTRY

Electronic industry has large number of small components, requiring precision transport and short production cycle.

For these reasons, production lines should be optimally configured. Therefore, project includes not only production phases, but also inspection and service stands as well as specific storage requirements of product sensitive to electrostatic discharges (ESD).

RACK 19" 6HU ESD CABINETS

RACK cabinets enable easy and fast construction of a measuring station at every workplace.

They are designed for mounting of equipment with housing in 19" 6HU standard. They are ideal security of headends prior to mechanical damage.

- 10 profiles RACK with possibility of position adjustment
- Cabinet mounting on two tilted brackets - adjustable possibility of position adjustment relative to a table top
- Detachable back cover divided into 3 parts
- Cable duct in the lower wall on whole cabinet width
- Ventilation openings in the upper and lower wall
- Safety module in the right segment of the cabinet equipped in safety button, RCD fuse 16A 30mA AC, 4 overcurrent switches S301 B16 and 3x10 mm² strip
- 4 external socket 230V/16A on the back of the safety module
- 230V/16A power cord 3 m length
- 2 grounding points
- Whole construction protected against ESD
- 1 end cup 2WU width and 2 end cups 1WU width
- Self assembly cabinet, delivered in one package
